DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-8, 10-16, 19-33, 35-36, 49 are rejected under 35 U.S.C. 102(b) as being anticipated by Reddy (5,626,893).

The claims are rejected for the reasons of record cited in the last office action and for these further reasons. The above claims have been amended to require processing steps in composition claims, which are not given weight.

The limitations of claims 10-16, 19-33 have been discussed above and are obvious for those reasons. No weight is given to the limitation of "applied to a potato substrate" (claim 24) which is a process limitation. Also, no weight is given to the processing limitations of claims 25-36.

Claims 12, 13-14, 16, 28, 29, 30-34, 38-45, 48, 49 are rejected under 35 U.S.C. 102(a) as being anticipated by Horn et al. (6,159,521).

Horn et al. disclose a coating for potatoes containing rice flour which is 80 mesh in amounts more than 56% which are partially cooked and frozen as in claims 12, 13, 14, 16, 28, 29, 30-34, 38, 39, 41, 42, 43, 44 (col. 1, lines 9-15, col. 5, lines 9-31 and col. 9, lines 5-15). The product is seen to be free from reticulation as the process is the same. Dextrins as in claim 44 are disclosed in col. 9, lines 5-15. The further

Application/Control Number: 09/960,191

Art Unit: 1761

limitations of the various sizes are seen to have been shown by the 80 mesh size. Claim 48 further requires reconstituting the product which is disclosed as "finished frying" the product (col. 8, lines 41-44).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 15, 17 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Horn et al. (6,159,521).

Claim 15 further requires using rice four having particles large than 80 mesh and claim 17 requires the use of rice flour of 120 mesh size and claim 18 further requires that 5% of the rice is a 120 mesh size. However, the reference discloses that other flours and starches could be optionally used (col. 6, lines 55-59). These different flours most likely have larger mesh sizes. No patentable distinction is seen in using 5% of the rice in this size, absent anything new or unexpected, as the rice seems to be a filler. Therefore, it would have been obvious to use a small amount of rice of a larger size in the composition and to use rice flour in a known size as disclosed in claim 17 which absent a showing to the contrary would be about 120 mesh.

Application/Control Number: 09/960,191

Art Unit: 1761

Claims 3, 9, 23, 37, 46, 47, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 50 and 51 are allowable.

ARGUMENTS

Applicant's arguments filed 2-17-04 have been fully considered but they are not persuasive. Applicants argue that the anti-caking product of the Reddy reference no longer coats the cheese when the cheese is heated as in a pizza product, but melts into the cheese. However, no weight is given to the process limitations in a composition claim, and the limitations of the composition claim have been disclosed. As to the process a new reference has been added to Horn et al.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
